

Chapter VI

Exercise 03 : count_files

| | |
|---|--|
|  | Exercise 03 |
| | count_files.sh |
| | Turn-in directory : <i>ex03/</i> |
| | Files to turn in : count_files.sh |
| | Allowed functions : None |

- Write a command line that counts and displays the number of regular files and directories in the current directory and all its sub-directories. It should include ".", the starting directory.
- Example of output :

```
$>./count_files.sh | cat -e
42$
$>
```
