

Chapter IV

Exercise 01 : ft_print_params

	Exercise 01
ft_print_params	
Turn-in directory : <i>ex01/</i>	
Files to turn in : ft_print_params.c	
Allowed functions : write	

- We're dealing with a program here, you should therefore have a function **main** in your **.c** file.
- Create a program that displays its given arguments.
- One per line, in the same order as in the command line.
- It should display all arguments, except for **argv[0]**.
- Example :

```
$>./a.out test1 test2 test3
test1
test2
test3
$>
```
