Chapter VIII

Exercise 05 : ft_print_comb

|	Exercise 05
	ft_print_comb
Turn-in directory : *ex05/*	
Files to turn in : `ft_print_comb.c`	
Allowed functions : `write`	

- Create a function that displays all different combinations of three different digits in ascending order, listed by ascending order - yes, repetition is voluntary.

- Here's the intended output :

```
$>./a.out | cat -e
012, 013, 014, 015, 016, 017, 018, 019, 023, ..., 789$>
```

- 987 isn't there because 789 already is.

- 999 isn't there because the digit 9 is present more than once.

- Here's how it should be prototyped :

```
void ft_print_comb(void);
```
