Chapter VIII

Exercise 05 : ft_show_tab

|	Exercise 05
	ft_show_tab
Turn-in directory : *ex05/*	
Files to turn in : `ft_show_tab.c`	
Allowed functions : `write`	

- Create a function that displays the content of the array created by the previous function.

- Here's how it should be prototyped:

```c
void ft_show_tab(struct s_stock_str *par);
```

- The structure will be the same as the previous exercise and will be defined in the `ft_stock_str.h` file

- For each element, we'll display:

  - the string followed by a '\n'

  - the size followed by a '\n'

  - the copy of the string (that could have been modified) followed by a '\n'

- We'll test your function with our `ft_strs_to_tab` (previous exercise). Make it work according to this !
