Chapter V

Exercise 02 : ft_str_is_alpha

	Exercise 02
	ft_str_is_alpha
Turn-in directory : *ex02/*	
Files to turn in : `ft_str_is_alpha.c`	
Allowed functions : `None`	

- Create a function that returns 1 if the string given as a parameter contains only alphabetical characters, and 0 if it contains any other character.

- Here's how it should be prototyped :

```
int     ft_str_is_alpha(char *str);
```

- It should return 1 if `str` is empty.
