Chapter X

Exercise 07 : ft_putnbr

|	Exercise 07
	ft_putnbr
Turn-in directory : *ex07/*	
Files to turn in : `ft_putnbr.c`	
Allowed functions : `write`	

- Create a function that displays the number entered as a parameter. The function has to be able to display all possible values within an `int` type variable.

- Here's how it should be prototyped :

```c
void ft_putnbr(int nb);
```

- For example:

  - `ft_putnbr(42)` displays "42".
